Whether you want to free your mind or move freely up hills, the all-new electric Bird Bike is built to move with precision, performance and power. Built by the same team of vehicle designers and engineers who introduced shared electric scooters to the world.

Bird's electric bike is designed to capture the thrill of the ride and premium performance with best in class safety features including a manual throttle for an instant e-boost, a fully integrated backlit handlebar dash display and a powerful 500w motor for a smooth, yet powerful ride. The electric Bird Bike is perfect for your everyday commute, leisurely riding and everything in-between.

Bird's state-of-the-art e-bike combines the best features of commuter bikes, mountain bikes, and electric powered bikes to create the ultimate ride.
